DME COLLAPSIBLE S-CORE

The most innovative solution for undercuts

THANKS TO IT'S INNOVATIVE DESIGN THE S-CORES ARE ABLE TO DELIVER:

- Up to **25 %** undercut
- Diameters as small as **6 mm** & as large as **400 mm**
- **Safety stop**, preventing the damaging of the segments
- **EASIER MACHINING:** thanks to its **flat back**, it's easier to fix the core on the magnetic table and machine the required profile to realize the undercut
- **PRECISE INSTALLATION:** The back of the S-core has **holes for screws and dowel pins** to precisely position it in the mold. If needed different dowel pins can be used, in case the part not rotational symmetric
- **EXTENSIVE VARIETY OF APPLICATIONS:** Many possibilities are available, such as cores with **6, 8 or 12 segments**, round or square retaining rings to better suit your application

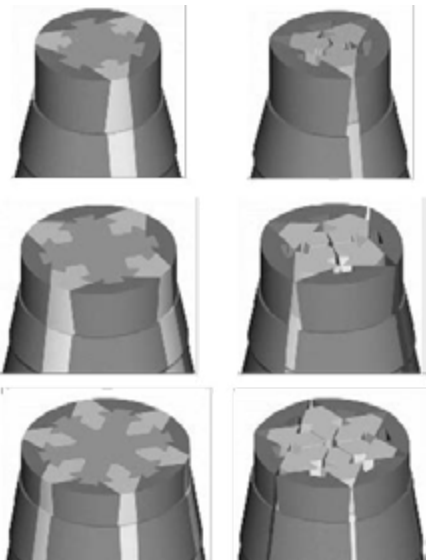

is

The **Engineering team of DME** develops custom solutions for every application.

No other collapsible core on the market delivers this **level of versatility** with such quality and value.
